

PRACTICAL 9

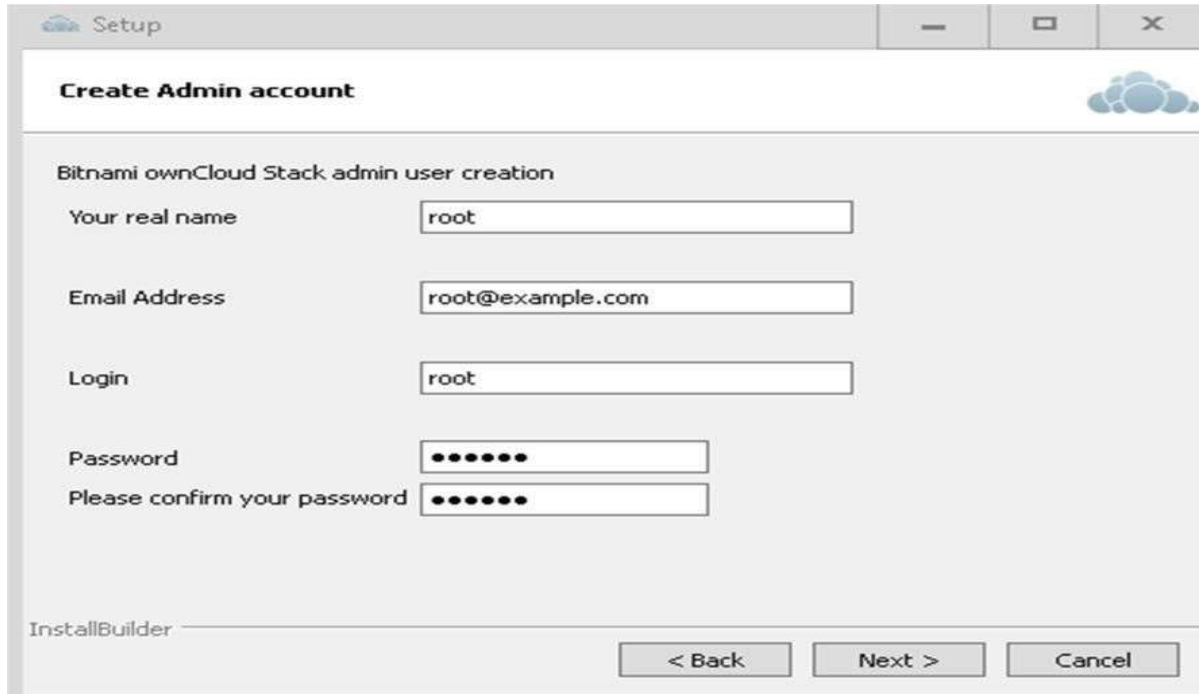

1. Install Xampp and Start Apache and MySQL services.

2. Download and install bitnami ownCloud.

3. Create Admin account.

The screenshot shows a window titled "Setup" with a subtitle "Create Admin account". The window contains a form for creating an admin user. The form fields are:

- Your real name: root
- Email Address: root@example.com
- Login: root
- Password: (masked with dots)
- Please confirm your password: (masked with dots)

At the bottom of the window, there are three buttons: "< Back", "Next >", and "Cancel". The "InstallBuilder" logo is visible in the bottom left corner.

4. Enter username and password which you have set while creating account and click on Log In.

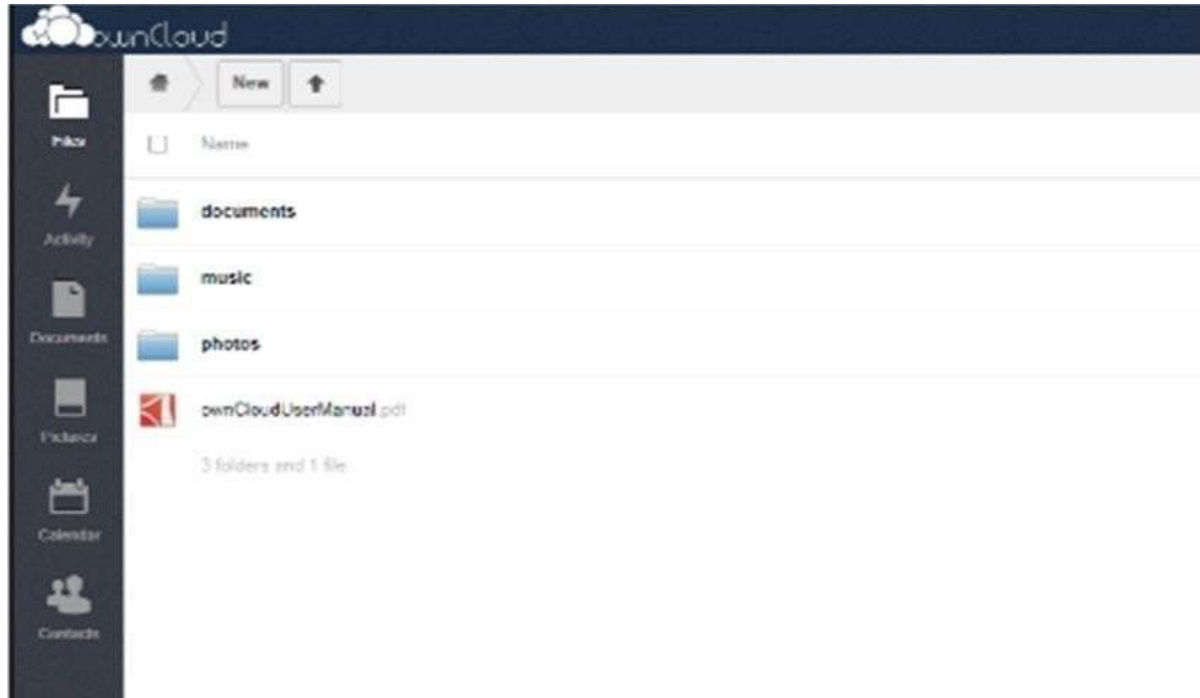

The screenshot shows the ownCloud login page. The page has a dark blue background with the ownCloud logo at the top. Below the logo, there is a login form with two input fields:

- Username: root
- Password: (masked with dots)

Below the password field, there is a checkbox labeled "remember". To the right of the form is a large blue button labeled "Log in".

5. Following Dashboard will get loaded.

6. You can Create Groups, Add Users to Groups. You can Create Admin User and Normal User. Admin User has more rights than the Normal User. It is done using ownCloud.
